SACHNOVA

TECHNOLOGIES PRIVATE LIMITED

Engineering Intelligence. Building What’s Next.

CORPORATE PROFILE · 2026

Technology built around real-world needs.

SACHNOVA TECHNOLOGIES PRIVATE LIMITED is a technology company focused on artificial intelligence, software engineering, cloud platforms, automation, data and digital transformation. We approach technology with an engineering mindset: understand the problem, design responsibly, build for maintainability and keep the people using the system at the centre.

CORE CAPABILITIES	WHAT WE FOCUS ON
Artificial Intelligence	AI assistants, agentic workflows, knowledge retrieval and practical automation.
Software Engineering	Custom web applications, business portals, APIs and maintainable software systems.
Cloud & DevOps	Cloud architecture, deployment automation, reliability and operational foundations.
Data & Analytics	Data foundations, reporting, integration and decision-support experiences.
Digital Transformation	Modernisation and connected digital experiences aligned to business requirements.

Product initiative

Vennela AI is a SACHNOVA product initiative exploring a human-guided AI assistant for voice interaction, desktop assistance and multi-step digital workflows. The product direction emphasises review-first interactions, clear permissions and user control. Product capabilities and release availability are confirmed as development progresses.

How we work

• Understand the business context and the people affected.

• Define a clear scope, constraints and success criteria before implementation.

• Choose appropriate technologies with security, maintainability and usability in mind.

• Build iteratively, validate the outcome and communicate limitations transparently.

Founder & leadership

Sai Lakshmana Reddy
Founder & Chief Executive Officer

The company is led with a focus on engineering quality, responsible use of AI and practical technology outcomes. Further leadership and team information can be shared through direct company engagement.
